- ^a Welding with chamfering is available based on the same welding volume/strength.
- ^b Welding otherwise mentioned in the figured in this International Standard and in this table :minimum leg length is to be ½ of the thinner plate thickness.
- ^c The SWL is the maximum applicable rope tension.

The SWLs shown in this table are for reference only. These are based on the loadings as mentioned in Annex A.

The "SWL" may be adjusted depending on the actual loading conditions, and the actual marking shall be agreed between the used and the manufacturer.

^d The calculated weight is for reference only excluding foundation
